

June 3, 2011

Ms. Barb Langner
Medicaid Director
Kansas Health Policy Authority
Landon State Office Building
900 SW Jackson, Suite 900
Topeka, KS 66612

**Subject: State of Kansas HealthWave XXI Actuarial Certification for
July 1, 2011 – June 30, 2012 Capitation Rate Ranges**

Dear Ms. Langner:

In this letter, **Optumas** provides the certification of the actuarially sound capitation rate ranges for the State of Kansas' (State's) HealthWave XXI managed care program for the July 1, 2011 through June 30, 2012 (SFY12) contract period.

This letter is organized as follows:

- Background,
- Medical Base Data,
- Program Change Adjustments,
- Inclusion of Non-Medical Load,
- Relational Modeling,
- Regional Factors,
- Development of Rate Range,
- Risk Mitigation,
- Incentives, and
- Actuarial Certification.

Background

For this certification, **Optumas** follows guidance provided by the CMS in accordance with 42 CFR 438.6(c). CMS defines actuarially sound rates as meeting the following criteria:

1. They have been developed in accordance with generally accepted actuarial principles and practices,
2. They are appropriate for the populations to be covered and the services to be furnished under the contract, and
3. They have been certified by an actuary who meets the qualification standards established by the American Academy of Actuaries and follows practice standards established by the Actuarial Standards Board.

Optumas applied these criteria in our certification of the HealthWave XXI Managed Care Organization (MCO) capitation rate ranges for the SFY12 contract period.

Medical Base Data

Optumas utilized calendar year 2009 (CY09) financial data as the primary data source in the rate setting process. The financial data reflects actual medical expenses for the managed care organizations (MCOs) for each of the following rate cells.

Children's Health Insurance Program (CHIP) – includes:

- < 1 M & F
- 1-5 M & F
- 6-14 M & F
- 15-19 M
- 15-19 F

In addition to the financial data, encounter data from July 1, 2007 to December 31, 2010 was also used as a supplement to the financial data. Both of these data sources did not net out any pharmacy rebates received by the MCOs from manufacturers. It is assumed that the MCOs will not receive any rebates in SFY12¹, so the CY09 experience was not reduced for any rebates the MCOs received during this base time period.

Program Change Adjustments

The following adjustments were then made to the medical base data in the development of the capitation rate ranges. Estimates provided below correspond to a reference point in the **Optumas** rate range. As in prior rate development processes, we followed the State's policy of applying all fee-for-service (FFS) program changes directly to the managed care program while customizing for the HealthWave XXI populations and benefits.

¹ H.R. 3590, the "Patient Protection and Affordable Care Act" ("PPACA"), could eliminate all pharmacy rebates received by the MCOs.

Rate Change for Codes 90460 and 90461

Effective January 11, 2011, certain procedure codes for pediatric vaccines were changed from paying \$14.80 per shot to paying \$7.40 per antigen. The impact was calculated by converting the existing utilization on the vaccine administration codes in question from a per shot to a per antigen basis, then comparing the costs of administering the utilization under the new payment structure. The impact of the program change on the CY09 base data is -0.004%.

Palivizumab (Synagis®) Pricing Adjustment

Effective October 5, 2010, the fees for Synagis increased. The impact of this program change was estimated by comparing the cost of administering Synagis under the current and proposed fee schedule. The impact of the program change on the CY09 base data is 0.004%.

Diagnosis Restriction for Leuprolide Acetate (Lupron®, Eligard®)

Effective July 12, 2010, the administration of leuprolide acetate was limited to certain diagnosis codes. The impact of this change was estimated by assuming the previous utilization billed under the restricted diagnosis codes would not be paid in the contract period. The impact of the program change on the CY09 base data is -0.008%.

Non-coverage of Consultation Codes

Effective March 1, 2010, KHPA stopped paying for consultation codes in conjunction with the decision by CMS to do the same. The estimate of this change was calculated assuming the utilization would move to other appropriate codes for the office visits. The impact of the program change on the CY09 base data is -0.32%.

Professional Rate Leveling

When billed by certain provider specialties, the fees for certain procedure codes were changed effective December 18, 2009. The impact of this change during the contract period was estimated by re-pricing the utilization of these procedure codes at the effective and proposed rates to calculate the difference. The impact of the program change on the CY09 base data is -0.07%.

Kansas University Hospital Inpatient Rate Change 2010

Because KU is reimbursed according to a percentage of their billed charges, we analyzed the difference between the percentages in place in CY09 and the expected percentage assumed for the SFY12 contract period. During CY09 (depending on the date of service), KU was reimbursed using 35%, 42%, or 44% of billed charges. The assumption for SFY12 is that KU will be reimbursed at 48% of billed charges. The impact of the program change on the CY09 base data is 0.33%.

DRG Weights & Rates for 10/1/2009 (applies to non-KU hospitals)

The DRG program change was used to calculate the impact during the contract period of the inpatient DRG schedule changes, including both the rate and outlier fees. The DRG program

change was estimated by comparing the utilization at the old contracted DRG/Outlier schedules during the base period to the new schedule effective 10/1/10. The impact of the program change on the CY09 base data is -0.17%.

HealthWave XXI Expansion

Effective January 1, 2010, HealthWave XXI eligibility was increased from 200% of the Federal Poverty Level (FPL) to 250% of the 2008 FPL. **Optumas** used Medicaid Rx² to measure the acuity difference between the expansion population compared to the population under 200% FPL. Based on that analysis in conjunction with the projected enrollment for the expansion population, the impact on the CY09 base data is -0.7%.

Trend

Trend is an estimate of the change in utilization rate (frequency of services) and unit cost (pure price change, technology, acuity/intensity, and mix of services) of services over time and is used to project the costs from the base period to the future contract period. When these are applied, in combination with other program changes noted above so as to not double count, they estimate the approximate claims costs a MCO could expect during the SFY12 contract period. **Optumas** applied trend by major category of service (COS) (e.g., inpatient, outpatient, etc.); refer to the table below for specific average annual PMPM COS trend rates.

Optumas analyzed historical trend rates and projections from many different sources, including HealthWave-specific financial and encounter data, national/local publications, commercial data, and data from other state programs. The assumed trends shown below are average annual figures. They were applied for 30 months to trend the midpoint of the CY09 base to the midpoint of the SFY12 contract period.

COS	PMPM Average Annual Trend Rates
Inpatient Hospital	-10.7%
Outpatient Hospital	0.7%
Physician	-3.4%
Lab/Radiology	-1.6%
Transportation	-2.9%
Pharmacy	3.9%
Other	-3.8%
Overall	-1.7%

When developing the average annual trends listed above, trend assumptions were developed for three distinct time periods: CY09/10, CY10/11, and CY11/SFY12. Steep negative trends were observed in both the financial and encounter data from CY09 to CY10. We believe that the

² Medicaid Rx is a pharmacy based risk assessment model developed by the University of California, San Diego.

negative trends may reflect the healthier populations enrolling in HealthWave in CY10 due to the economic recession. As a reasonableness check against the observed financial and encounter data, we used Medicaid Rx to determine any change in the acuity of the underlying risk of the population from CY09 to CY10. The results from Medicaid Rx showed a similar decrease in risk relative to the financial and encounter data, and we therefore reflected the data-driven impact within our CY09/10 trends. The trends assumed for CY10/11 and CY11/SFY12 were flat or positive, which reflect the conservative assumption that the impact of the recession will lessen from what was observed in CY10.

Inclusion of Non-Medical Load

The non-medical load measures the dollars associated with components such as administration, profit, risk, and contingencies and are expressed as a percentage of the capitation rate.

Optumas reviewed the MCOs' responsibilities under their managed care contracts and reviewed their past non-medical expenses as reported in their financial submissions. We also reviewed non-medical expenses in other states, on both a PMPM and percentage basis.

At the reference point in the rate range, we included a 12.0% non-medical load factor and a 2.0% profit on each rate cell. The non-medical loading varied across the rate ranges, with a higher non-medical load assumed at the lower bound and a lower non-medical load assumed at the upper bound to account for the management necessary to result in corresponding medical costs.

Additionally, the capitation rates were increased to reflect a privilege fee assessed on the MCOs of 1.0% of their capitation revenue.

Relational Modeling

Relational modeling adjustments were applied to the rate ranges to control for any data issues or anomalous results. These were applied in a budget neutral manner; individual rate cells may have been adjusted, but the total composite rate for the HealthWave program remained the same. These adjustments primarily impacted the more volatile rate cells with lower enrollment levels.

Regional Factors

The HealthWave capitation rate ranges were first developed by rate cell at the statewide level. **Optumas** conducted an analysis of the cost differential, normalized for demographic mix differences, in each of the four regions of the State.

The regional factors were developed using program-specific financial data for CY09. In addition, encounter data was reviewed for CY08–CY10.

Development of Rate Range

Optumas provided the State with actuarially sound rate ranges for negotiations with the MCOs. **Optumas** calculated the variability in rates within the rate range by modifying the assumptions used, including trend and non-medical load. The CY09 databook by region is shown in Appendix A. The development of the statewide rate ranges and member months used are shown in Appendix B. **Optumas** has provided a summary of the rate ranges for each of the four regions in Appendix C. All contracted rates are within the actuarially sound rate range. Appendix D provides a brief summary of the CMS ratesetting checklist with compliance to each section noted.

Risk Mitigation

Reinsurance

The MCOs purchase commercial reinsurance on the open market. We have assumed that a portion of reinsurance premium expense is part of our non-medical loading assumption noted above.

Risk Corridors

There are no risk corridors in the HealthWave XXI contract.

Incentives

There are no incentives included within the HealthWave XXI contract.

Actuarial Certification

I, Tim Doyle, Senior Actuary at **Optumas** and Member of the American Academy of Actuaries (MAAA) and a Fellow of the Society of Actuaries (FSA), am certifying the calculation of the rate ranges shown in Appendix B and Appendix C. I meet the qualification standards established by the American Academy of Actuaries and have followed the practice standards established from time to time by the Actuarial Standards Board.

The capitation rates provided with this certification are considered actuarially sound for purposes of the 42 CFR 438.6(c), according to the following criteria:

- The capitation rate ranges have been developed in accordance with generally accepted actuarial principles and practices;
- The capitation rate ranges are appropriate for the populations to be covered, and the services to be furnished under the contract; and
- The capitation rate ranges meet the requirements of 42 CFR 438.6(c).

The actuarially sound rate range that is associated with this certification is effective July 1, 2011 through June 30, 2012 for the HealthWave XXI program.

The actuarially sound capitation rate range is based on a projection of future events. Actual experience will vary from the experience assumed in the rate range. The capitation rate range developed may not be appropriate for any specific MCO. An individual MCO should review the rates in relation to the benefits that it is obligated to provide to the covered population. The MCO should evaluate the rates in the context of its own experience, expenses, capital, surplus, and profit requirements prior to agreeing to contract with the State. The MCO may require rates above, within, or below the actuarially sound rate range associated with this certification.

Please feel free to contact me at 480.588.2494 for any additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Doyle", with a large, sweeping flourish extending to the right.

Tim Doyle, FSA, MAAA
Senior Actuary

¹ Rates are composited using the SFY10 membership distribution by region and rate cell

Appendix D – CMS Checklist

CMS Item#	Subject	Compliance	SFY12 HealthWave Rate Comments
AA.1.0	Overview of ratesetting methodology	✓	Rate Certification Letter Pages 1-2.
AA.1.1	Actuarial Certification	✓	Rate Certification Letter Pages 6-7.
AA.1.2	Projection of expenditures	✓	
AA.1.3	Procurement, prior approval, and ratesetting	✓	State set rates are developed.
AA.1.4	N/A	✓	There is no item AA.1.4 in the CMS Checklist.
AA.1.5	Risk contracts	✓	
AA.1.6	Limit on payment to other providers	✓	
AA.1.7	Rate modifications	✓	N/A The rates certified in this letter are effective July 1, 2011 – June 30, 2012 and will not be modified unless new information that materially impacts the rates becomes available.
AA.2.0	Base year utilization and cost data	✓	Rate Certification Letter Page 2.
AA.2.1	Medicaid eligibles under the contract	✓	Only HealthWave program eligibles and cost data have been included in the rate base.
AA.2.2	Dual eligibles	✓	The HealthWave program does not include any members dually-eligible for Medicare and Medicaid.
AA.2.3	Spend down	✓	Spend down eligibles are not part of the HealthWave program.
AA.2.4	State Plan services only	✓	Non-State Plan services were removed from the base data.
AA.2.5	Services that may be covered by a capitated entity out of contract savings	✓	
AA.3.0	Adjustments to base year data	✓	Rate Certification Letter Pages 2-4.
AA.3.1	Benefit differences	✓	Rate Certification Letter Pages 2-4.
AA.3.2	Administrative cost allowance calculations	✓	Rate Certification Letter Page 5.

CMS Item#	Subject	Compliance	SFY12 HealthWave Rate Comments
AA.3.3	Special population adjustments	✓	As discussed in the Rate Certification Letter on Page 4, the rates were adjusted to reflect new HealthWave 21 populations due to the expansion.
AA.3.4	Eligibility adjustments	✓	Enrollment levels for SFY10 and CY10 were reviewed while developing the SFY12 HealthWave rates.
AA.3.5	DSH payments	✓	The HealthWave rates do not include DSH payments.
AA.3.6	Third party liability (TPL)	✓	The MCOs are responsible for collection of any TPL recoveries; the base rates are accordingly net of these amounts.
AA.3.7	Copayments, coinsurance, and deductibles in capitated rates	✓	HealthWave enrollees do not have copayments, coinsurance, and deductibles.
AA.3.8	Graduate medical education (GME)	✓	N/A
AA.3.9	FQHC and RHC reimbursement	✓	An adjustment was not made for FQHC/RHC reimbursement as the State is responsible for the cost settlement outside of the capitation rate.
AA.3.10	Medical cost trend inflation	✓	Rate Certification Letter Pages 4-5.
AA.3.11	Utilization adjustments	✓	A utilization adjustment was applied to reflect the eligibility expansion and can be found on page 4 of the new certification letter.
AA.3.12	Utilization and cost assumptions	✓	As discussed in the Rate Certification Letter on Page 4, the rates were adjusted to reflect new HealthWave 21 populations due to the expansion.
AA.3.13	Post-eligibility treatment of income (PETI)	✓	N/A
AA.3.14	Incomplete data adjustment	✓	The rate development methodology does not include an IBNR adjustment since the CY09 base data has 12-23 months of runout, depending on the date of service.
AA.4.0	Establish rate category groupings	✓	Rate Certification Letter Page 2.
AA.4.1	Age	✓	Rate Certification Letter Page 2.

CMS Item#	Subject	Compliance	SFY12 HealthWave Rate Comments
AA.4.2	Gender	✓	Rate Certification Letter Page 2.
AA.4.3	Locality / Region	✓	Rate Certification Letter Page 5.
AA.4.4	Eligibility categories	✓	Rate Certification Letter Page 2.
AA.5.0	Data Smoothing	✓	Rate Certification Letter Page 5.
AA.5.1	Special populations and assessment of the data for distortions	✓	Outlier experience was reviewed and population-level distortion was addressed where necessary.
AA.5.2	Cost-neutral data smoothing adjustment	✓	Rate Certification Letter Page 5.
AA.5.3	Risk Adjustment	✓	N/A
AA.6.0	Stop loss, reinsurance, or risk sharing arrangements	✓	HealthWave MCOs have reinsurance coverage and there is no risk sharing arrangement with the State.
AA.6.1	Commercial reinsurance	✓	The State requires HealthWave MCOs to purchase reinsurance coverage.
AA.6.2	Simple stop loss program	✓	N/A
AA.6.3	Risk corridor program	✓	N/A
AA.7.0	Incentive arrangements	✓	N/A
