

Scope of Work

Kansas Army National Guard

The Kansas Army National Guard is seeking Solicitation's for Design Services (Architectural and Engineering) to modify the existing or replace as needed it's existing fire alarm and detection system within it MATES (Maneuver Area Training Equipment Site) facility located on the campus of Ft. Riley in Junction City. This facility is a 119,287 SF equipment maintenance and rebuild facility with supporting fabrication and calibration shops along with parts warehouse and administrative offices in order to bring the current system in compliance with current codes and Ft. Riley Fire Marshall standards. It also will include the addition of a mass notification system which currently does not exist within the facility. Services will include preliminary design, design development, construction drawings, bid assistance and post award construction site supervision and inspection.

Richard Decant, construction branch chief
