

Link or Unlink your personal 'LinkedIn' account from your State of Kansas 'LinkedIn' Learning account

To unlink your accounts:

Here's a tip

State of Kansas does **NOT** require that learners have a connected LinkedIn profile in order to access LinkedIn Learning.

If you wish to disconnect your profile due to privacy concerns, please note that even when the profile is connected to your Learning account, your organization can only see your LinkedIn profile picture and the **information you've set to "public"**. (See **Learn more** section below.) They won't have access to your personal email account, InMail messages, or other private profile information. Also, by disconnecting your Learning license from your profile, we won't be able to provide you specialized content recommendations, and you'll no longer see your course history or certificates of completion on your LinkedIn profile. LIL courses & certificates are still retained in KLPM and LinkedIn Learning.

If you still wish to disconnect your Learning license from your LinkedIn profile and your admin is unable to do so due to your account settings:

1. Log in to [LinkedIn Learning](#).
2. Click your photo in the top right corner, and select **Settings** from the dropdown that appears.
3. Below **Disconnect your LinkedIn account from your LinkedIn Learning account provided by your organization**, click **Disconnect my account**.
4. Click **Disconnect**.
5. You'll automatically be prompted to the login screen to either reactivate a license or access another license you already have available.

To link your accounts (optional):

Doing this will show your course and license history on your LinkedIn personal account.

1. Log in to [LinkedIn Learning](#).
2. Click your photo in the top right corner, and select **Settings** from the dropdown that appears.
3. Below **Connect your LinkedIn account to your LinkedIn Learning account provided by your organization**, click **Connect my account**.
4. Click **Connect and log in with your LinkedIn account**.
