Agency Partners:

In 2018, NACHA enacted a new rule to supplement data security requirements. This rule change requires that we (the State of Kansas and any vendors processing ACH files on our behalf) render unreadable account numbers used for ACH initiation when those numbers are stored electronically.

This rule change will go into effect for the State of Kansas on **June 30, 2020**. If your agency is not currently in compliance with this rule change, please take the necessary steps to ensure compliance by that date.

To view frequently asked questions regarding this rule, please visit the NACHA website at: <https://www.nacha.org/rules/supplementing-data-security-requirements>.

If your agency requires any assistance, please contact my office and we will be happy to help in way that we can. If you would like the verbiage for the actual rule, please contact Shauna Wake, Director of Fiscal Services, at shauna@treasurer.ks.gov.

Finally, for your information, files sent through our office will be retained for seven (7) fiscal years plus the current year and these files will be encrypted to comply with the NACHA rule.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jake LaTurner", is written over a printed name.
